

## Laboratory Autoclave Specialists

Since 1946, Consolidated Sterilizer Systems has been recognized as an innovator and technical resource in the steam sterilizer industry — providing the most **reliable**, **affordable** and **customizable** sterilization systems for laboratory and medical research facilities. Through ongoing research and development, we continue to create and integrate new technologies into our products that benefit our clients.

**“We aim to satisfy our customers and be the thought leaders in the autoclave industry.**

Our success is a testament to the quality of our products and the dedication of our employees, who strive for excellence each and every day.”

- President and CEO Arthur Trapotsis
